

Flooring Comparison

Item	Aqua Ceramic	Aqua-Tech LFP	Laminate Flooring	SPC Flooring
Core Material	Inorganic Material	Super HDF	HDF	PVC
Formaldehyde release	EO	E1	E1	E1
Content of pb & Cd	ND	/	/	Pb: 4mg/kg Cd : ND
Dimension stability	Excellent	Well	Well	Affected by temperature & sunshine
Easy to bend	Excellent	Good	Good	Affected by temperature & moisture
Water proof	Super Water proof	Water resistance	High Water absorption	Water proof
Fire resistance	A2	B2	B2	B1
Abrasion resistant	Excellent	Excellent	Excellent	Good
Scratch resistant	Excellent	Excellent	Excellent	Easy to scratch
Impact resistance	Excellent	Good	Good	Well
Foot feeling	Hard	Soft	Soft	Hard
Anti-termite	Y	N/A	N/A	Y
Anti-mildew	Y	N/A	N/A	Y
Density	1500kg/m ³	≥880kg/m ³	800kg/m ³	2000kg/m ³
Under floor heating	Excellent	Y	Y	No

Aqua Ceramic

100% Water-Proof

Adopting green organic material(XPF) with waterproof, environmental protection, mildew resistance, geothermal resistance and other characteristics, after more than 24 hours immersed water test, it is still very stable. Our unique formaldehyde removal technology makes the flooring's environmental performance far better than the national standard, better than Japan's F4-STAR-GRADE. In addition, it has advantages, such as easy to clean, wear resistance and etc. Formaldehyde emission is lower than $0.05\text{mg}/\text{m}^3$. It is suitable for buildings with high requirements for waterproof and environmental protection to create a green, safe and comfortable modern space.

Flooring Advantage

Super Waterproof

High Resistance and Scratch Resistance

High Weather Fastness

High Stable Performance

Formaldehyde Removal Technology

4V Bevel

Mould proof

AC5 wear resistance

Installs Anywhere Indoors

Stain Resistant

100%
Water-Proof
